

Introducing the **NEW** Goldtouch

V2 Adjustable Keyboard

NEW Convenient Hot Keys are natively supported by your operating system and don't require additional driver installation.

Our signature adjustability allows for 0-30° adjustment on the horizontal and vertical planes to put users in their ideal comfort typing position.

NEW Added space between keyboard and home row reduces the risk of mis-keying.

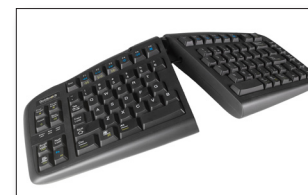

NEW Sleeker modern design.

Easy to use Plug and Play technology that connects with a USB or PS2 port.

NEW adjustable feet on the back of the keyboard offer typists the option of positioning the keyboard in a negative sloping angle.

NEW Half keys for Caps Lock, Shift, and Ctrl reduce typing errors.

NEW increased height of dimples on home keys: F, J, I.

Soft key touch, low activation force and full key travel distance provides keying comfort and reduces the risk of "bottoming out."
