### Cleaning Code Definitions

W-S: Clean with water-based cleaning agents, foam or pure water-free solvents. (Energine, Carbonna, Renuzit or other similar products). Vacuuming or light brushing is recommended to prevent dust and soil build up.

Colour Fastness: Colour fastness to light is the degree to which the fabric will retain its colour when exposed to light. Class 4 minimum at 60 hours is recommended for direct sunlight exposure situations.

Note: Colour Fastness results may vary from colour to colour.

These are directional fabrics.
